***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 and 28-30, drawn to a system and method for server providing multimedia resource updating indication to clients, classified in class 709, subclass 203.
  - II. Claims 10-16 and 31-32, drawn to a system and method for multimedia file management, classified in class 707, subclass 104.1.
  - III. Claims 17-22 and 33, drawn to a system and method for executing a query in a multimedia system, classified in class 707, subclass 3.
  - IV. Claims 8-9 and 23-27, drawn to a system and method for synchronizing the multimedia file in the network, classified in class 370, subclass 241.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, invention I is directed to a method comprises the steps Providing a indication of an update to a multimedia resource to the clients. The invention II is directed to a method comprises the steps of editing a plurality of courses and organizing a plurality of multimedia resources into one of the plurality of courses. The invention III is directed to a method comprises the steps of executing a query to determine available information. The invention IV is directed to a method comprises the steps of maintaining current state synchronization information for the multimedia content on a synchronization server.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-7 and 28-30) would require use of search

**Class 709, subclass 203.**

(b) the Group II search (claims 10-16 and 31-32) would require use of search

**Class 707, subclass 104.1.**

(c) the Group III search (claims 17-22 and 33) would require use of search

**Class 707, subclass 3.**

(d) the Group IV search (claims 8-9 and 23-27) would require use of search

**Class 370, subclass 241.**

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is reminded that the required for response to this requirement is 30 days, not one month.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.
